Recipy: Put content on the Library Box

The LibraryBox is already configured.

Download a video from the internet (mp4)

Place the microline usbdrive into the laptop/pc

Copy the video to the microline usbdrive

Put it in the video in the (driveletter):\LibraryBox\Shared\video folder

Place the microline usbdrive into the Library box

Connect the LibraryBox into a power source.

Wait until the LED-flashing of the LibraryBox stops.

Login with your mobile device to the wifi of the LibraryBox (LibraryBox – Free Content!)

If connected set your browser to <http://librarybox.us>

Download the your video to your mobile device.

Learning resources:

Build a Digital Library and share it: <http://librarybox.us/>

Build your own Library Box: <http://librarybox.us/building.php>

Tip:

You can download a free e-books from the Gutenberg project and put it to your LibraryBox. <https://www.gutenberg.org/>
